No more worries about heat loss, noise, moisture damage, and fire hazards when a home is insulated with "Premium Plus™ Insulation for Amerrock Products, LP. Being a mineral fiber," Premium Plus™ Insulation is the natural barrier that keeps you quietly warm, dry and safe — without the addition of potentially harmful chemicals. "Premium Plus™" does not burn, decompose, or absorb moisture — and it doesn't settle, so neither should you. "Premium Plus™" Insulation is one upgrade that pays for itself year after year. IT'S THE NATURALLY SUPERIOR INSULATION!

Seymour, CT 06483
800.768.6815, Ext. 9310
203.881.5089 FAX
www.basementsystems.com

Our innovative and forward-thinking approach to designing products has solved wet basement problems that the basement waterproofing and crawl space industry has faced for decades, and our patented sump pump systems are the smartest and most reliable. Plus we listen to our customers and respond accordingly! **Basement Systems Inc.** has been awarded 24 Patents and 19 Innovation Prizes on waterproofing products we use every day, including a battery backup sump pump system. This approach ensures the best waterproofing systems and solutions available.

BaySystems Insulation & Roofing

2400 Spring Stuebner
Spring, TX 77380
281.350.9000
www.baysystemsspray.com

BaySystems™, a subsidiary of Bayer MaterialScience™, manufactures spray foam wall insulation, roofing foam insulation, and a full line of specialty coatings that are used for thermal and moisture protection, roofing, waterproofing, abrasion resistance, and other applications. BaySystems products enhance the total building envelope to provide sustainability, durability, energy efficiency, and improved occupant comfort.

Our Bayseal™ OC and CC spray polyurethane foam insulation creates a cleaner, healthier environment that is also energy efficient. These insulation products shield building occupants against air infiltration, pollen, dust, and noise.

BioBased Insulation

1475 W. Cato Springs Road
Fayetteville, AR 72701
800.803.5189
479.966.4601 FAX
www.biobased.net

BioBased Insulation offers a line of soy-based, spray foam insulation products that can help reduce utility bills by up to 50 percent and increase indoor air quality. Because they are made from an annually renewable resource, the polyurethane insulation also supports 600,000 farmers and reduces our dependence on foreign oil.

BioBased Insulation revolutionized the insulation industry when it began offering high-quality, environmentally responsible insulation products at competitive prices in 2003. The science behind the success of **BioBased Insulation** is the integration of natural and renewable ingredients that reduce the amount of petroleum in these products.

The current commercial and residential insulation product lines include BioBased 501, a .5 lb, open-cell spray foam; and BioBased 1701, a closed-cell, 1.7 lb spray foam. Both products are water-blown and contain no CFCs (Chloroflouro Carbons) or HCFCs (Hydrochloroflouro Carbons) so they are better for the environment.

Brentwood Industries

621 Brentwood Drive
Reading, PA 19611
610.236.1193
610.736.1293 FAX
www.brentwoodindustries.com

AccuVent manufactured by **Brentwood Industries** provides an excellent wind washing barrier while allowing you to insulate the entire outer wall of the home. AccuVent is very simple to install with only 6 staples involved. Here's why you should use AccuVent:

- * Labor and Material savings. (No cardboard folding — No insulation stuffing).

ICAA 2009 Convention & Trade Show

Hilton El Conquistador • Tucson, AZ • October 1– 3, 2009

- * Prevents insulation from getting into the soffit.
- * Made of 100% recycled PVC which is flame retardant and self extinguishing in less than 5 seconds.
- * Plastic is much more durable when stapling than the competition.
- * AccuVent will not absorb moisture which prevents the growth of mold.
- * Very easy to transport and takes up less warehouse space. (One bundle of vent is equivalent to 1" in height)
- * Perforations allow for adjustment to irregular spaced rafters.
- * Available in both 14.5" and 22.5" widths by 41" length.
- * High Energy AccuVent is now available to increase your home's R-Value. (50" vs. 41" in length).

cfiFOAM, Inc.

The Energy Conservatory (TEC) is a leading manufacturer of specialized diagnostic tools to measure building air tightness, leakage of forced air duct systems, building pressures, and other variables that determine building performance. **TEC** designs, manufactures and sells the Minneapolis Blower Door™, the Minneapolis Duct Blaster®, the TrueFlow™ Air Handler Flow Meter, Digital Pressure Gauges, and is a building science distributor for Flir Infrared Cameras.

TEC has been providing diagnostic tools to weatherization contractors, building researchers, HVAC contractors, insulators, homebuilders, remodelers, and energy auditors since 1981.

FiberTEK Insulation

925 South 4400 West
Salt Lake City, UT 84104
801.972.3244
801.972.0521 FAX
www.fibertekinsulation.com

FiberTEK Insulation — performance fiberglass insulation products

The pedigree of **FiberTEK Insulation** extends back to the early nineteen fifties when Ivan Radman first arrived in Australia from Croatia and started to leave his mark upon the world. Ivan took an interest in insulation. Radman and his family eventually migrated to America and set up a fiberglass plant in Salt Lake City, UT, under the name of Western Fiberglass that operated successfully for several years and was sold in 1995 to Owens Corning Fiberglass.

FiberTEK Insulation's re-entry into the market incorporates a first-class performance fiberglass insulation product line:

- * QuickBATT™ Kraft Faced Fiberglass Batts with no flanges and batts are cut extra wide for cost-effective and quick installation with an easy friction fit.
- * BigBATT™ Performance fiberglass insulation batts available in many different R-values and dimensions to meet the independent professional contractors needs.
- * InsulTEK™ Superior fiberglass loose-fill insulation that is effective when installed in attics, walls, and subfloors.

Our new Western facility scheduled to open in late 2008 will help us to service the Western US with Premium **FiberTEK Insulation**.

High-R Insulation Systems

2335 230th Street
Ames, IA 50014
515.292.5714
515.292.0440 FAX
www.high-r.com

When you think about it, the whole process for installing insulation in metal buildings is backwards. Doesn't it make more sense to put the roof on first, then put in the insulation. That way, you can insulate in any weather. According to your schedule. With the highest R-value insulation. Well, it made more sense to us. So we invented a new patented process. Take a look and see how much smarter the **HIGH-R** approach is for both new construction and retrofit.

Icynene Inc.

6747 Campobello Road
Mississauga, Ontario, Canada L5N 2L7
905.363.4040
800.758.7325
905.363.0102 FAX
www.icynene.com

The **Icynene**® Insulation System is a low density, spray-in-place soft foam insulation. 100% water-blown, it expands to 100 times its volume in seconds to create a superior insulation and air barrier. **Icynene**® is a trusted product for green buildings and supports environment and energy conservation programs. Ideal for new or retrofit construction, **Icynene**® is highly demanded by builders and contractors. Consumers find **Icynene**® healthier, quieter, and more energy-efficient as it can cut up to 50% of energy consumption costs. These are a few of the reasons why **Icynene**® Dealers agree that, by adding **Icynene**® to their current product lines, they have significantly expanded their business and improved their profits. **Icynene**® offers Dealers an impressive package that can increase sales to existing customers and improve profits by delivering higher margins. **Icynene**® Dealership Program includes comprehensive technical service and marketing support programs. Intec

3771 Monarch Street, P.O. Box 579
Frederick, CO 80530
303.833.6644
303.833.6650 FAX
www.inteccorp.com

At **Intec**, we know what it takes to make a fast, reliable, no-nonsense all fiber insulation machine. The original developer of high production electric airtlock insulation machines, **Intec** has been recognized as a leader in the industry for over twenty-five years and continues to be with the latest addition of the Force/3. In fact, customers have consistently

rated our Force line the best in its class-year after year.

All Force & Wasp models employ the fewest moving parts which means lower maintenance and less downtime. Force machines are 2-3 times more productive than many of its competitors. Force machines can blow up to 4,675 lbs/hour of light density cellulose or 1,430 lbs/hour of fiberglass.

Intec's lightweight and portable machines are a favorite among applicators who on occasion need to be closer to the job. Dense Pak walls are a breeze when operating a Force machine, using the variable speed blower control allows the operator to dial in the correct blower pressure for blowing a perfect wall or sound proof an area using our OptiSpray, combatt system.

No other manufacturer offers the support like **Intec** with over 200 service centers across the United States to help assist you when service is needed.

R-Factor / Blow In Blanket is your headquarters for the Blow-In-Blanket® and Blow-In-Blanket® HP systems. The Blow-In-Blanket® system (BIBS®) is a custom-fitting wall system which offers the best R-Values in the industry. Approved and tested fibers for Blow-In-Blanket® and Blow-In-Blanket® HP are CertainTeed's InsulSafe® SP and Optima®; Johns Manville's Climate Pro® and Spider™; and Knauf's Perimeter Plus™. Not only does BIBS give you an R 4.23 per inch, you also get the added benefit of 68% reduction of air infiltration in your wall cavities over conventional methods of insulation. The Blow-In-Blanket® system completely fills around objects inside the wall cavity, resulting in excellent sound control. The Blow-In-Blanket® HP wall system is our hybrid performance insulation system. The Blow-In-Blanket® system and spray polyurethane foam are two of the most popular choices for insulating and reducing air infiltration in a home. BIBS® HP is a revolutionary hybrid system that combines the performance benefits of these two systems to achieve a high-performance, economical insulation solution. Approved foam for the Blow-In-Blanket® HP system are BASF Spray-Tite™; CertainTeed CertaSpray™; Convenience Products CPD System™; and Fomo Products Magnum System™.

Roxul Inc.

Our EZ-Path™ product line offers a variety of fire-rated cable pathways and accessories with superior smoke and leakage ratings. Our broad SpecSeal® product line includes intumescent and endothermic sealants, intumescent wrap strips, collars and pillows, mortar, and elastomeric joint sealants.

Stop by **STI's** booth for complete solutions for your complex firestop needs!

Spray Insulation Components

8000 G Wilshire Court
Oklahoma City, OK 73132
405.722.9292
405.722.1130 FAX
www.sprayinsulation.com

Spray Insulation Components provides a complete line of equipment and accessories for the blowing and spraying insulation contractor. With over 40 years of experience, we can assist the contractor with application and equipment problems. **Spray Insulation Components** has the most complete inventory of specialty and obsolete parts for the industry. In addition to manufacturing the **Insul Maxx** line of insulation machines, **Spray Insulation Components** is now a distributor for Krendl Insulation Equipment and Graco Spray Foam Equipment.

Tripolymer Inc.

1824 Cherie Lane
N. Fort Myers, FL 33917
866-977-FOAM
www.injectionfoam.com

Tripolymer Inc. provides foamed-in-place insulation for application in stud walls, masonry cavity walls, and concrete unit masonry cores. Tripolymer Foam provides excellent R-value and superior noise reduction and is used to insulate existing homes and new homes.

Practically any void that requires insulation can be filled with Tripolymer.

It is ideal for use in:

- * Concrete masonry unit block cores
- * Interior & exterior wood and steel stud wall systems
- * Pre-cast concrete panels
- * Pipe chases
- * Filling property line voids between high-rise buildings, and more.

Unisul

863.294.6771 FAX
www.unisul.com

UNISUL manufactures and sells residential insulation blowing machines, sidewall spraying machines, sidewall netted installation machines, and commercial sprayed fiber fireproofing machines. A new line of spray foam application systems has recently been added to the product mix. Accessories such as application hose, hose couplings, reducers, water delivery systems, and radio remote control units are also offered.

A full-service facility is available for repairs and new machine installations. **UNISUL** also provides contract engineering and product development services for the industry. Since 1936 **UNISUL** has been a leader in the design and fabrication of quality application equipment and our customer support is unparalleled.

Visit **UNISUL's** booth to learn why you should make your next machine or spray foam system a **UNISUL**.

Urethane Soy Systems Company

100 Caspian Avenue
Volga, SD 57071
817.899.6681
605.274.1659 FAX
www.soyol.com

Urethane Soy Systems was founded by a veteran formulator who saw the economic, functional, and environmental potential in using soybean oil in polyurethane applications. The company established a state-of-the-art facility deep in the heart of soybean country to manufacture Soyol® and soy based polyols. Utilizing patented technology, **USSC** produces polyols which are 100% from soy bean oil.

As proof of concept, **USSC** also manufactures spray, flexible, and rigid foam systems.

The Soytherm series of spray foams has been developed to supply the spray foam market with "greener" insulation choices.

Most notably, **USSC** has successfully incorporated its polyols in seats and headrests used in the automotive industry.

Urethane Soy Systems is the only manufacturer today who holds a BEES report showing its polyols actually sequester CO₂.

Venture Tape Corp.

30 Commerce Road
Rockland, MA 02370
781.331.5900
